cryptozoology, nonfiction  
— reports of eyewitness  
sightings of apparent  
living pterosaurs in many  
states of the USA

How can giant “pterodactyls,” distinctly non-extinct, live in the United States of America? Why have many credible eyewitnesses been ignored by the news media? And how do four kinds of fear threaten to haunt those who have encountered the creatures?

Living pterosaurs and ignorant news professionals—both are explained in the book. The four kinds of fear involve an eyewitness’s doubt in what the eyes have seen, what the creature might do, what other people might think, and how our cultural ideas can be wrong. Few persons have the courage to speak up.

This shocking [nonfiction cryptozoology](#) book speaks out for the truth about what eyewitnesses have encountered.

Copyright 2010-2017 Jonathan Whitcomb

Probably the first nonfiction book written about pterosaurs sightings from coast-to-coast, [Live Pterosaurs in America](#) escorts you through extraordinary investigations by Jonathan Whitcomb, who is probably the world’s leading expert on pterosaur sightings. Investigate the credibility of these sightings through the words of the eyewitnesses of creatures that many of our textbooks tell us are long extinct. Learn why those many books are wrong. Discover what really flies overhead.

A reader of the first edition, from South Carolina, made the following comment to the author:

“Your new book arrived today! . . . you really did a wonderful job!!! You not only gave everyone more sightings than they can dispute (21 states!!!), but you also wove a descriptive and engaging ongoing investigation . . . To have so MANY sightings recorded should NOT be ignored. . . . Thank you again for the WONDERFUL book!!!!!!” (from Susan Wooten, an eyewitness in South Carolina)

A reader of the third edition wrote:

Mr. Whitcomb does a thorough job questioning indoctrination and the close-mindedness of the Western world. Reading so many eye-witness reports of people who have seen living pterosaurs in America was mind-opening . . .”
